Join us as we look at how the 'Big Book' went from an early realization that we needed to cut ties with the Oxford Group, formulate our own "Practical Program of Action", unique to alcoholics in a consistent and resolute document, with the ability to help suffering alcoholics anywhere to a life free from alcoholism. This process began with no knowledge of how to accomplish this or what was involved in the process, and has since become a saving grace to millions, described as a "a new light has entered the dark world of the alcoholic" that can only be attributed to "The divine alchemy of a caring and loving God", as we understand God.
